

The Covid-19 vaccination

Kent and Medway
Clinical Commissioning Group

The coronavirus (Covid-19) vaccines are safe and effective. Vaccines are the best protection for you, your family and your community.

Getting your vaccine

There are different ways to get a Covid-19 vaccine.

Book online now for appointments at a vaccination centre, pharmacy or GP surgery. www.nhs.uk/covid-vaccination

If you can't book online, you can **call 119 free of charge**, where you can speak to a translator if you need to.

The currently available vaccines are given in two doses. To get the best protection against Covid-19, you must have the two doses.

Local vaccination clinics

There is a local vaccination clinic taking place:

On: **Saturday 24 July, from 10am to 5pm**

At: **Folca (Old Debenhams Store), 48-66 Sandgate Rd, Folkestone, CT20 1DN**

For: **Over 18s**

Vaccine information helpline

Our vaccine information helpline has been set up to provide you with more information on the vaccine and answer any question you may have. This is provided by our partners *Involve Kent* with translation available if needed. **0330 320 4444**

You cannot book your vaccine using this phone number.

Vaccine myth X

It was rushed and isn't safe

It changes my DNA

It can give you Covid-19

It contains egg protein

It causes severe side effects

It makes women infertile

It contains alcohol

It can't be taken if you have existing health issues

There is human and animal DNA in the vaccine

There is a microchip inside the vaccine

Vaccine fact ✓

Researchers took **no safety shortcuts**. Large studies show the vaccine is safe

It's **impossible** for the vaccine to change your DNA

The vaccine **doesn't contain a live virus strain**

It **doesn't contain egg proteins** and can be given to people with allergies

For most, the vaccine causes **mild side effects** that resolve in a few days

There is **no evidence** that the vaccine causes infertility

It **doesn't** contain alcohol

Always contact your GP, if you have existing health issues

The Covid-19 vaccines **do not** contain human or animal DNA

There are **no microchips** inside the Covid-19 vaccines
